SUMMARY

Ph.D. candidate in quantum computing with 10+ years of experience. Advised by Scott Aaronson, graduating in 2025, seeking an industry position adapting my research background to industry objectives. Proven communicator and collaborator in research, teaching, and leadership roles.

- Quantum algorithms and query complexity, Hamiltonian complexity, Theoretical computer science
- 7+ publications: QIP, TQC, CCC, ...
- 2 National Labs internships
- **Coding:** College Java Instructor, quantum simulations in Python, undergraduate projects with Android, Python, Java, and AWS.
- 20+ professional presentations

EDUCATION

Ph.D. in Computer Science The University of Texas at Austin	Expected May 2025
Advised by Scott Aaronson. Quantum computation, Complexity theory, Algorithms	
M.S. in Computer Science The University of Texas at Austin	2022
Selected courses: Machine learning, Randomized algorithms, Programming languages	
B.S. in Computer Science Virginia Commonwealth University	2018
B.S. in Mathematical Sciences	concurrent degrees
Specialization in Data Science. Minor in Physics.	
Awards: Capstone Design Award. \$660 grant for senior project Android app.	2017
VCU Presidential Scholarship (\$110,000). Awarded to 0.6% of students.	2014

EXPERIENCE

R&D Intern Sandia National Laboratories	June 2023 – present
<ul style="list-style-type: none">• Initiated and completed a project in 6 months which was accepted to QIP (top venue).• Proved complexity of Hamiltonian product state optimization problems, complementing the work of the Sandia optimization algorithms group. Derived 3D geometric approximations to optimization problems. Designed new variants of Grover's algorithm.	
Summer School Fellow Los Alamos National Laboratories	Summer 2019
<ul style="list-style-type: none">• Designed new algorithms for entanglement spectroscopy requiring fewer qubits while maintaining noise-resilience. Published in <i>Quantum</i>.• Programmed noisy quantum circuit simulations in Qiskit Python up to 24 qubits.• Experimented with Honeywell Quantum device to test new circuit designs.• Maintained code and data using git, GitHub, Jupyter, and Unix tools. (link)	
Research Assistant Computational Graph Theory Lab, Virginia Commonwealth University	Summer 2018
<ul style="list-style-type: none">• Programmed algorithms for computing graph properties in Sage/Python.• Maintained database and improved project documentation and management using git, GitHub. (link)	
NSF REU Researcher QuICS, The University of Maryland	Summer 2017
Research Assistant Quantum Computing Lab, Virginia Commonwealth University	2015 – 2016
<ul style="list-style-type: none">• Started as a freshman and self-taught necessary linear algebra, TCS, and QC over the summer.• Contributed key ideas for multiple proofs. Published 2 papers as an undergraduate.	

ADDITIONAL ACTIVITIES

Head Teaching Assistant Quantum Information Science for M.S. students	Spring '22, '23, '24
<ul style="list-style-type: none">• Responsible for all assignments, students questions, and more. Supervised 4 graduate TAs, 200+ students.	
Instructor Software Engineering (Java), UT International Academy	Summer 2021
Founder and President RamDev: Software Development at VCU	2016 – 2018
<ul style="list-style-type: none">• Coordinated 46 weekly seminars. Increased attendance, becoming largest C.S. organization at VCU.	
Teaching Assistant Undergraduate Rhetoric (English), Virginia Commonwealth University	2015
