## SUMMARY

Ph.D. candidate in quantum computing advised by Scott Aaronson, graduating in 2025, seeking an industry position. Proven skills in research and communication.

- 7+ publications in top venues (QIP, TQC, ...) • 20+ professional and public presentations.
- Quantum algorithms, complexity, Hamiltonians • 2 National Labs, 3 universities, and 11+ co-authors

## EDUCATION

|  |                      |
|--|----------------------|
| <b>Ph.D. in Computer Science</b>   The University of Texas at Austin               | Expected May 2025    |
| Advised by Scott Aaronson. Quantum computation, Complexity theory, Algorithms      |                      |
| <b>M.S. in Computer Science</b>   The University of Texas at Austin                | 2022                 |
| Selected courses: Machine learning, Randomized algorithms, Programming languages   |                      |
| <b>B.S. in Computer Science</b>   Virginia Commonwealth University                 | 2018                 |
| <b>B.S. in Mathematical Sciences</b>   | (Concurrent degrees) |
| Specialization in Data Science. Minor in Physics.                                  |                      |
| Awards: <b>Capstone Design Award</b> . \$660 grant for senior project Android app. | 2017                 |
| <b>VCU Presidential Scholarship</b> (\$110,000). Awarded to 0.6% of students.      | 2014                 |

## EXPERIENCE

|   |                     |
|---|---------------------|
| <b>R&amp;D Intern</b>   Sandia National Laboratories  | June 2023 – present |
| <ul style="list-style-type: none"><li>• Initiated and completed a project in 6 months which was accepted to QIP (top venue).</li><li>• Proved complexity of Hamiltonian product state optimization problems, complementing the work of the Sandia optimization algorithms group.</li><li>• Retained as a year-round intern.</li></ul>   |                     |
| <b>Summer School Fellow</b>   Los Alamos National Laboratories  | Summer 2019         |
| <ul style="list-style-type: none"><li>• Designed new algorithms for entanglement spectroscopy requiring fewer qubits while maintaining noise-resilience. Published in <i>Quantum</i>.</li><li>• Experimented with Honeywell Quantum device to test new circuit designs.</li><li>• Programmed noisy quantum circuit simulations in Qiskit Python up to 24 qubits.</li><li>• Maintained code base using git, GitHub, Jupyter, and Unix tools.</li></ul> |                     |
| <b>Research Assistant</b>   Computational Graph Theory Lab, Virginia Commonwealth University  | Summer 2018         |
| <ul style="list-style-type: none"><li>• Wrote algorithms for computing graph properties in Sage/Python.</li><li>• Maintained a database of graphs, properties, and theorems.</li><li>• Improved project documentation and management using git, GitHub.</li></ul>   |                     |
| <b>NSF REU Researcher</b>   QuICS, The University of Maryland   | Summer 2017         |
| <ul style="list-style-type: none"><li>• Reviewed literature, performed numerical experiments, and investigated quantum tomography.</li></ul>  |                     |
| <b>Research Assistant</b>   Quantum Computing Lab, Virginia Commonwealth University   | 2015 – 2016         |
| <ul style="list-style-type: none"><li>• Started as a freshman and self-taught necessary linear algebra, TCS, and QC over the summer.</li><li>• Contributed key ideas for multiple proofs. Published 2 papers as an undergraduate.</li></ul>   |                     |

## Teaching

|   |                      |
|---|----------------------|
| <b>Head Teaching Assistant</b>   Quantum Information Science for M.S. students  | Spring '22, '23, '24 |
| <ul style="list-style-type: none"><li>• Led entire course except for recorded lectures. Supervised 4 graduate TAs, 200+ students.</li></ul> |                      |
| <b>Instructor</b>   Software Engineering (Java), UT International Academy   | Summer 2021          |
| <ul style="list-style-type: none"><li>• Developed entire course including lectures and Java programming assignments.</li></ul>              |                      |
| <b>Teaching Assistant</b>   Undergraduate Rhetoric (English), Virginia Commonwealth University  | 2015                 |

## ADDITIONAL ACTIVITIES

**Chair** | UT Computer Science Graduate Student Association Sep 2020 – Dec 2021

- GRACS representative to UTCS Diversity, Equity, and Inclusion (DEI) Council.
- Co-Organized Application Assistance Program for under-represented Ph.D. applicants. 2020

**Founder and President** | RamDev: Software Development at VCU 2016 – 2018

- Coordinated 46 weekly seminars including 9 corporate speakers and several hackathon trips.
- Secured and managed \$2400 in funding and resources.
- Increased weekly attendance to 20+ students, becoming largest C.S. organization at VCU.
